DETAILED ACTION

Claims 1-16 and 17-99 are pending in this application.

Action Summary

1. The examiner will vacate the office action dated July 17, 2007 in lieu of the restriction requirement below.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to fluticasone composition, classified in class 424, subclass 489.
- II. Claims 17 and 19-81, drawn a to sterile filterable fluticasone composition, classified in class 424, subclass 400.
- III. Claims 82-99, drawn to composition comprising an immunosuppressive agent, classified in class 514, subclass 885.

The inventions are independent or distinct, each from the other because:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the

Art Unit: 1616

particulars of the subcombination as claimed because the composition of group I, does not need to be prepared for sterile filtration. The subcombination has separate utility such as sterile pharmaceutical composition.

Inventions III and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the composition of group III is directed to a broad recitation of immunosuppressive agents, whereas, group I is specific to fluticasone. Group III can comprise other immunosuppressive agents such as adrenocorticosteroids, sulfasalazine, etc. The subcombination has separate utility such as a fluticasone composition.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Art Unit: 1616

Inventions II and III are directed to an unrelated product and process. Product and process inventions are unrelated if it can be shown that the product cannot be used in, or made by, the process. See MPEP § 802.01 and § 806.06. In the instant case, group II is drawn to a sterile filterable fluticasone composition whereas, group III is drawn to a composition comprising an immunosuppressive agent.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Christian Bauer on October 11, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
